EDUCATION

University at Albany, SUNY - Albany, NY

May 2025

Bachelor of Science, Computer Science & Mathematics

Minors in Business & Informatics

GPA: 3.8/4.0

PROFESSIONAL EXPERIENCE

VEPA Auto-Care - Albany, NY

September 2025 – Current

Co-Owner

- Manage full daily operations of the shop, including staffing, workflow and customer service.
- Lead long-term planning initiatives, including business remodeling, expansions and exit strategies.
- Negotiate with banks for loan and partnership opportunities to expand and offer financing to customers.
- Oversee VEPA's online presence, including the design and deployment of a modern, responsive website.
- Implement and maintain cloud-based inventory systems to streamline listings, inquiries and administrative updates.

Manager

2022 – 2025

- Implemented customer-centric upselling strategies (maintenance packages, service add-ons), driving a 40% increase in monthly revenue.
- Built and deployed VEPA Auto-Care's responsive online inventory platform implementing real-time filtering, dynamic listing cards, and Google Maps integration for dealership locations.

NYS Office of General Services Procurement Services - Albany, NY

2024 – 2025

Student Intern

- Designed and deployed automated Excel workbooks (VBA macros) to collect and consolidate procurement data, cutting manual data-entry time by 55% and improving reporting accuracy.
- Integrated macros into daily workflows for multiple divisions, enabling real-time status updates and reducing errors in quarterly reports by 30%.
- Analyzed existing procurement processes and recommended/implemented process improvements that streamlined contract tracking and yielded faster turnaround on vendor onboarding.
- Assisted in preparing and reviewing contracts by coordinating with legal, finance, and vendor teams to ensure compliance and timely execution.

SUNY Albany - Albany, NY

2023 – 2025

Teaching Assistant for BITM215 (Business Information and Technology Management)

- Lead weekly lab sessions on advanced Excel functions (pivot tables, VLOOKUP, Power Query) to help 100+ students solve real world business data analysis problems.
- Translate complex IT/IS concepts (CRM, SCM, data trends, SQL queries) into actionable exercises, resulting in a 33% average improvement in student assessment scores from previous years.
- Provide one-on-one support for data visualization projects, teaching core e-business and information security principles to nontechnical students.
- Proctor and grade exams; collaborate with faculty to refine curriculum and identify areas where supplemental instruction is needed.

Shogun Sushi - Delmar, NY

2022 – 2023

Server & Bartender

- Delivered high-quality service to diners in a fast-paced sushi restaurant, balancing front-of-house duties with bar responsibilities during peak dinner shifts.
- Managed POS transactions, processed payments, and maintained accurate tabs for up to 8 tables simultaneously, ensuring timely order delivery and check accuracy.

Emack & Bolios - Albany, NY

2019 – 2024

Shift Manager

- Trained and supervised 10+ frontline staff on service standards, managed daily operations and improved customer satisfaction ratings.

PROJECTS

Ora – Personal AI Tech Consultant

May 2025

- Developed a cross-platform AI assistant that joins Google Meet calls, listens and responds in real time using Whisper and GPT, and stores conversation transcripts in Firebase. Features include user auth, Chrome extension integration and transcript syncing.
- Awarded “Best Project” out of 21 class entries, recognizing excellence in innovation, implementation, and real-world impact.

Math AI Tutor

February 2025

- Developed an AI-driven math tutoring web app using Spring Boot, Maven, Firebase, Postman, and vanilla JavaScript for interactive problem solving.

Excel Data Collection & Automation

September 2024

- Automated data aggregation workflows by authoring VBA macros across multiple linked workbooks, converting manual report generation into an automated process.

Virtual Processor

May 2024

- Constructed a virtual processor using Java in Eclipse. The system simulates a simplified CPU architecture and instruction set. The system mimics real hardware through software abstraction, reinforces best practices in object-oriented design (OOD) and instruction cycle emulation.

Professor Pursuit (Endless Runner) (Sunny Albany 24-Hour Hackathon)

May 2024

- Engineered a 3D endless runner game in Unity (C#); implemented procedural environment generation, character animations, and collision detection.

Travel Buddy

May 2024

- Created a full-stack travel planning web app with React (front end), C#, and MongoDB (back end), allowing users to search, save, and rate destinations.

AWK Compiler & Interpreter

December 2023

- Constructed an AWK compiler/interpreter using Java through Eclipse. The system performs lexical analysis to tokenize input, apply parsing techniques and build an AST to interpret instructions in real time.

CAMPUS INVOLVMENT

IEEE Student Chapter – University at Albany, SUNY

May 2025

Personal Portfolio Design

- Delivered a workshop to 50+ attendees, covering HTML/CSS/JavaScript fundamentals, hosting options (GitHub Pages, Firebase Hosting), and best practices for content layout and professional branding.

Albany Boxing Club – University at Albany, SUNY

2024 – 2025

Lead Coach & Fitness Instructor

- Designed and led weekly training sessions 4 times a week for a 200+ member club, teaching boxing fundamentals, conditioning drills, and proper technique.
